Dear Parents and Legal Guardians of Elementary School Students,

The Santa Fe Service Unit Dental Staff would like to provide a dental screening, dental sealants, and a fluoride application for every student at your school this year. We will be visiting your school at the beginning of the school year.

Fluoride varnish makes your child's teeth stronger and protects against cavities. To make the fluoride varnish effective, your child should receive fluoride varnish at least twice a year. It is even helpful for some kids who have early cavities to have fluoride varnish applied monthly. It can prevent cavities from growing bigger.

Dental sealants make the chewing part of teeth smooth, making it harder for sticky things to stick to the grooves of the tooth and cause cavities. The sealant gives the tooth extra protection against cavities. After placement of the sealant, your child may state that their bite feels high. However, with normal chewing, the sealant will wear to their normal bite.

In order to provide these services, we will need your written consent, if you would like your child to receive these services, please sign where indicated below and complete the attached Medical History Form. With signed consent, these routine services may be provided without you having to be present.
